## Shed those holiday pounds quickly and easily with guidance from 'The hCG Guru'

by **JASON ZAUDER**

Wait – it's January already? Since Halloween we've had every excuse to indulge a little here, a little there... until little by little the indulgences became a bulge that had to be cleverly hidden beneath our clothes. But this is South Florida – we can't hide for long. For our appearance and for our health, it's time to start 2015 off right. And dropping all of that excess weight is a great first step. But how?

Why not resolve to do it the right way this time? At Slender Fit U, you can 'Get Slim, Skip the Gym' with their safe, effective weight loss program. They are the experts in providing South Florida with a proven, medically monitored hCG weight loss regimen.

### The HCG Guru

"We're the specialists in hCG, and we've been doing it longer than anyone else in South Florida," said 'The hCG Guru', Geri Kelleher, Slender Fit U's Founder and Program Director. "We specialize in hCG, and hCG alone – we're not going to try to sell you other services you do not need. I care about my clients, and we have excellent customer retention. Our main priority is our customer service, and people appreciate that there are no hidden fees with our pricing. We also use the highest quality hCG; there's no watering down the medication."

### "Changed My Life"

Clients are often most satisfied with the speed at which one can see the results of the hCG treatment. Women have been able to lose 15 pounds in three weeks, and 30 pounds in six weeks. Men have lost between 20 to 25 pounds in three weeks and 40 pounds in 6 weeks. Upon completion of the Slender Fit U program, 90% of their clients don't put any weight back on and can maintain their weight loss.

Jeff Bruce is just one example of the many clients who have benefitted from Slender Fit U's program. "I had never dieted before, and would

just eat and drink whatever I wanted. Slender Fit U literally changed my life. I lost 36 pounds there. With the weight I lost, my energy level has improved, my knees stopped aching, and people even say I look younger. It was just fun to see the results. I'd recommend it to anyone who is serious about dealing with a weight issue. I was skeptical at first, but it proved to be everything they said it would be."

### Natural Fat Loss & the Strongest Available hCG

The linchpin to Slender Fit U's success is how the hCG, or Human Chronic Gonadotropin, regimen helps people lose not just weight, but fat. If someone were to diet by solely reducing their caloric intake, their body would store fat and burn off lean muscle. The hCG works by triggering the brain's hypothalamus, which controls the body's metabolism. The hCG prompts the hypothalamus to release stores of body fat, and turns one's body into a virtual 'fat recycling center' as the body uses its own fat for fuel. The hCG can be taken via an injection or a small, medicated lozenge, and optional B12 vitamin injections are also offered at the clinic for an energy boost.

Various forms of therapy involving hCG, a complex amino-peptide protein naturally found

in the human body, have been around since 1953. In-house doctors supervise Slender Fit U's products and services. The process starts with a free, no-pressure consultation and new clients see a doctor for a routine physical exam as part of their enrollment.

They say that imitation is the sincerest form of flattery, but anyone interested in the best weight loss program should not be fooled by other companies or internet start-ups selling imitation or diluted hCG. What is referred to as 'homeopathic hCG' was once popular before being put out of business by the FDA for misleading claims. Many of these copycat programs lack the proper medical oversight for a prescription medication like hCG. Slender Fit U also uses the strongest available hCG dosage in order to maximize a client's weight loss.

### Real Food Diet

Slender Fit U clients eat a low-calorie diet made up of real food like proteins, fruits, and vegetables that one would find at any grocery store, with no special meals or packaged dinners needed. Since clients are already getting the calories they need from their own body fat, a low-calorie diet allows people to still feel full and avoid the feelings of hunger and agitation that often accompany other diets. If a client adheres to the Slender Fit U plan, one can actually re-set their metabolism by the end. "You'll have all the tools you need to not only lose weight, but keep the weight off," said Kelleher.

Kelleher takes pride in the success of every Slender Fit U client, and works hard every day to live up to her title as 'The hCG Guru'. "I did the hCG regimen, was hired at the clinic, and then opened my own clinic," she said. "I've put thousands of people successfully through our program."
